

U1000
Unattended terminal

Intelligent interaction

3.5-inch capacitive touch screen, enhanced user interaction and perfect for multiple value-add applications. Equipped with a built-in proximity sensor, the terminal will go into sleep mode while not in use to save energy.

All-in-one payment

The stand-alone terminal for secure acceptance of Chip and PIN, Mag-stripe, contactless as well as QR code payment introduces all payment possibilities to unattended business environments and offers an excellent self-service experience.

Durable and reliable

High level of waterproof protection (IP54), vandal resistance (IK08) and robust design for scratch resistance enables the terminal to withstand severe outdoor circumstances so as to reduce the operating costs.

Flexible connectivity

Multiple peripherals connectivity such as standard MDB interface to be seamlessly integrated into Kiosk and vending machines, RS232 and USB interface to flexibly fulfill various business demands.
